

Amendments to the Specification:

Please replace the first full paragraph on page 5 in the originally submitted specification with the following paragraph:

-- "Interior lighting arrangement 21 includes one or more light bulbs 22 secured to a power cord 28. Protective covers 25 are secured around each light bulb to protect the permeable fabric of inflatable display 10 from heat produced from each bulb. Interior lighting arrangement 21 is attached to interchangeable fan assembly 12 through electrical connector 23 on the bottom end of power cord 28 that mates with electrical connector 18 of interchangeable fan assembly 12. When interchangeable fan assembly 12 is switched from one display to another, an operator detaches electrical connector 18 on interchangeable fan assembly 12 from electrical connector 23 on interior lighting arrangement 21." --
